---

## RELEVANT EXPERIENCE

**Grad Intern – Commercial Leadership and Insights Program, Amgen,** USA **May 2026 – Aug 2026**

- Interned within Global Insights Oncology division of the Business Analytics and Insights team at Amgen
- Evaluated applications of AI in primary market research by developing and validating a simulated HCP panel to test messaging and visual concepts, benchmarking outputs against traditional PMR findings
- Developed a custom AI workflow trained over 130+ research transcripts and ATU (awareness, trial, usage) data to inform brand teams with insights and learnings from PMR
- Analyzed market research and commercial insights across two oncology disease areas - small cell lung cancer and prostate cancer, to support understanding of HCP needs, treatment dynamics, and market opportunities

**Student Consultant, Jobz,** USA (Curriculum Based Project, Duke University) **Aug 2025 – Dec 2025**

- Advised Jobz in evaluating AI-driven recruitment solutions, conducting market sizing, competitive benchmarking, and cost-benefit analysis to guide strategic positioning and investment priorities

**Associate Consultant, ZS Associates,** India **Jan 2025 – May 2025**

- Engaged with biopharma clients to support GTM of a rare disease product portfolio worth $20M
- Delivered presentations and reports summarizing findings and recommendations for executive leadership
- Defined success metrics and KPIs in partnership with key stakeholders, driving 90% early adoption and increased sustained engagement among 150+ brand team users
- Led a team of five to optimize a data architecture, reducing infrastructure costs by 30% (~$40K) for the client
- Designed a performance scorecard to monitor metrics, improving data accuracy by 40%
- Consistently recognized by managers and clients for high-quality insights and driving critical engagements

**Associate, ZS Associates,** India **Jun 2022 – Dec 2024**

- Led strategy and roadmap for a commercial data platform, aligning dev, QA and clients to prioritize 30+ business use cases across sales analytics, incentive compensation and forecasting within immunology disease market
- Launched weekly sales analytics report tracking reinstatements, HCP/Channel shifts and outlet dynamics, accelerating anomaly detection and informing brand and market access strategies
- Designed a dashboard to visualize performance insights of a drug portfolio across the US, Germany, Japan, and Spain, enabling C-level client executives to make decisions, reducing manual reporting time by 30%
- Ideated and orchestrated weekly gap-filling methodologies leveraging PySpark and SQL to address missing factor values, enhancing data coverage by 40% and significantly reducing data null
